DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a composite composition.

Group II, claim(s) 4 and 5, drawn to a liquid jet head.

Group III, claim(s) 6-8, drawn to a method of manufacturing a ferroelectric thin film.

1. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I, II, and III share the same technical feature; namely: a ferroelectric film made of a colloidal solution wherein water other than the water of crystallization in an organometallic compound is utilized in its synthesis. Such a shared technical feature is taught by the prior art such as Yonezawa et al (JP 04362015 A) (see for example, the abstract wherein a ferroelectric film (barium titanate) is prepared from a colloidal solution from an organometallic compound (such as barium alkoxide / titanium alkoxide) and water in addition to water of crystallization of the organometallic compound is utilized (see, for example the added water to adjust viscosity). As such this shared technical feature is common and is not special, therefore a lack of unity of invention exists *a posteriori*.

2. A telephone call was made to Kelly Hyndman on 7/9/09 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NATHAN H. EMPIE whose telephone number is (571)270-1886. The examiner can normally be reached on M-F, 7:00- 4:30 EST.
